## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Garey in view of Carlotta et al.

Garey discloses an airless atomizing nozzle comprising: a tubular body 40 having a bore, an inlet, an outlet and a first face; a member 44 with a second face and an orifice at the end of bore 45, a pin 50 with a target area 51 spaced over the delivery channel 45. Garey does not teach that the pin is secured by UV curable adhesive. However, Carlotta et al discloses pin 40 being secured in hole 43 by UV curable adhesive. Therefore, it would have been obvious to one having ordinary skill in the art to secure the pin of Garey with UV curable adhesive as suggested by Carlotta. Doing so would provide a way to secure a pin.

### ***Allowable Subject Matter***

3. Claims 1, 2, 5-12 are allowed.
4. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

5. Applicant's arguments filed 1/31/06 have been fully considered but they are not persuasive.

6. Applicant's arguments with respect to claim 12 have been considered but are moot in view of the new ground(s) of rejection.
